FOR 33 YEARS COVERING INFECTION CONTROL AND PREVENTION
33
HOSPITAL INFECTION CONTROL®
FOR 33 YEARS THE LEADING SOURCE OF NEWS AND COMMENT IN HEALTH CARE EPIDEMIOLOGY

2007 Index

Abstract & Commentary
antibiotic 'cycling' fact or fad, JAN:9
CR-BSIs are preventable, MAR:33

Active surveillance cultures
legislative mandates cloud discussion of, JUN:61
Pennsylvania law for includes screening health workers, OCT:119
pre-admission screening for surgical patients, JUN:66
SHEA, APIC against laws mandating, MAR:32
unintended consequences of, JUN:70

Antibiotic resistance
KPC drug resistance phenotype is transferable to other bacteria, DEC:140
federal antibiotic law draws support, NOV:127
resistant infections a challenge in long-term care, JUL:78

Association for Professionals in Infection Control and Epidemiology (APIC)
argues against laws mandating screening for MSRA, MAR:32
business case for infection prevention made by, APR:47
International Infection Prevention Week features patient tragic tale, DEC:141
prevalence study by finds MRSA rampant in hospitals, AUG:85

Bloodstream infections (BSIs)
Catheter-related are preventable, MAR:33
economics of preventing, JUL:83

Bioterrorism Watch
(Quarterly online supplement, all issues are available to subscribers in the archives at http://ahcmedia.com. Click "Please select an archive.")
chlorine fast facts, JUL:22
detect bio attack by bolstering systems for natural disease, OCT:30
hospitals ill-prepared to cope with pandemic, MAR:12
hurricane ratings for pandemic flu, MAR:14
mechanical vents in short supply if event occurs, OCT:25
nurses fear pandemic more than terror, OCT:27
Oregon policy addresses gaps in specimen transport, OCT:29
problems with transport of biothreat specimens after hours, OCT:28
state readiness scores, JAN:4
states not prepared to distribute meds, JAN:1
Strategic national stockpile, JAN:55
terrorists in the waiting room scenario, JUL:20
train wrecks and chemical terror, JUL:21
when supplies scarce and lives in the balance, JAN:6
XDR-TB case in the age of bioterror, JUL:17

Centers for Disease Control and Prevention
C. diff surveillance increase urged by, APR:37
director tries to reassure Congress about CA-MRSA, DEC:138
flu shots in health workers a patient safety measure, AUG:96
mask use advice for public during flu pandemic, AUG:93
new patient isolation guidelines issued by, AUG:91
standard precautions retooled by, SEP:104
study by finds 14% of invasive MRSA cases in community, DEC:136
study by finds MRSA kills more people in U.S. annually than HIV/AIDS, DEC:133

Centers for Medicare & Medicaid Services (CMS)
changes by could lead to unintended consequences, OCT:117
consumer groups welcome changes by, OCT:118

Clostridium difficile (C. diff)
asymptomatic carriers linked to transmission, NOV:121
deadly combo with inflammatory bowel disease, DEC:143
fatal infection acquired in community, FEB:18
found in retail meat in Canada, APR:37
new toxic strain may be emerging in food supply, FEB:13
prevention measures if asymptomatic carriers suspected, NOV:123
suspicion lingers transmitted by meat, NOV:125
surveillance increase of urged by CDC, APR:37
surveillance needed for hospitals, long-term care, FEB:17
vancomycin better first-line choice for infections, FEB:15

Community associated methicillin-resistant **Staphylococcus aureus** *(CA-MRSA)*
CDC director tries to reassure Congress about, DEC:138
CDC study finds 14% of the invasive MRSA cases are, DEC:136
Q&A with expert on, DEC:137

Hand hygiene
workers pledge compliance with, MAR:34

Health-care associated infections (HAIs)
hospital factors trump patient

Need back issues? Call our order department at (800) 688-2421; inside Georgia (404) 262-5476, or e-mail: customer service@ahcmedia.com. Copyright © 2007 AHC Media.

severity of illness, JAN:3
hospital liability for increasing in age of transparency, JUL:73
infected patients do worse than sickest controls, JAN:4
openness about may reduce patient lawsuits, JUL:73
studies dash dogma they are inevitable, JAN:1

HIV
MRSA kills more people in U.S. annually than, DEC:133

Healthcare Infection Prevention (Special section)
ambulatory care still under the IC radar, FEB:20
federal antibiotic law draws support, NOV:127
long-term care norovirus outbreak, NOV:126
resistant infections a challenge in long-term care, JUL:78

Infection control professionals (ICPs)
find a physician champion for infection prevention; JAN:6
get voices heard on infection rate disclosure laws, JAN:25

Infection rate disclosure laws
ICPs get voices heard on, JAN:25

Influenza
using seasonal shots to drill for pandemic, NOV:129

Joint Commission Update for Infection Control (Supplement)
Cancer patients should be offered flu shot, DEC:3
flu shot standard in effect for 2007-2008 season, DEC:1
flu shot standard stirs initial response, SEP:2
hand hygiene monitoring tool, MAR:3
hospitals not offering pneumococcal vaccine, JUN:1
Joint Commission, CDC study rapid flu tests, DEC:4
monitoring hand hygiene compliance, MAR:1
plain language protects patients, MAR:2
safe tissue handling practices recommended by, JUN:3
standards changes draw SHEA protest, SEP:1
Ten tips to stop flu spread, DEC:2
WHO hand hygiene recommendations added to patient safety goals, SEP:3

Journal Reviews
C diff, inflammatory bowel disease a deadly combo, DEC:143
economics of preventing bloodstream infections, JUL:83
nurse working conditions affect infection rates, JUL:83
vancomycin intermediate resistance in CA-MRSA, APR:44
unintended consequences of ASC, JUN:70

Klebsiella pneumoniae *carbapenemase (KPC)*
New drug resistance phenotype is transferable to other bacteria, DEC:140

Methicillin-resistant* Staphylococcus aureus *(MRSA)
consumer groups call for action to prevent, AUG:90
dialysis settings see increase in cases of, APR:42
dialysis settings prevention measures, APR:44
hospital prevalence study for nets 1,237 responses, AUG:87
increase of found in nation's hospitals, JUN:63
kills more people in U.S. annually than HIV/AIDS, DEC:133
legislative mandates for surveillance of, JUN:61
Pennsylvania law to screen health workers for, OCT:119
political compromise behind PA screening law, OCT:112
pre-admission screening for surgical patients, JUN:66
prevalence study finds an epidemic of in hospitals, AUG:85
SHEA, APIC against laws mandating screening for, MAR:32
VA hospitals make eradication of a priority, JUN:67
Q&A with expert on, DEC:137

Norovirus
national surveillance plans for in progress, NOV:115
long-term care outbreak of stopped, NOV:126
two new strains cause outbreaks, NOV:114

Occupational Safety and Health Administration (OSHA)
annual respirator fit testing can be enforced by: SEP:97
blunt suture needles should be used in surgery, JUL:81
rapid HIV tests required by for exposed health workers, MAR:30

Pandemic flu
using seasonal shots to drill for, NOV:129

Pertussis
false outbreaks linked to PCR tests, OCT:119
false outbreaks of cause chaos, MAY:57

Respirator fit-testing
annual testing can be enforced by OSHA, SEP:97
new mask needed for health care, SEP:99
occupational health researchers lobby for, SEP:100
XDR-TB, SARS revive controversy over, MAY:55

Severe acute respiratory syndrome (SARS)
undiagnosed cases spread infection of, MAY:56
revives controversy over respirator fit-testing, MAY:55

Society for Healthcare Epidemiology of America (SHEA)
argues against laws mandating screening for MSRA, MAR:32
debates ASC for MRSA at annual meeting, JUN:61

Surgical site infections
increase after alcohol skin preps banned, JUL:80
most severe yields better comparative data, MAR:29

Tuberculosis
extensively drug-resistant (XDR) strain emerges, MAY:49
forty-nine XDR cases found in U.S., MAY:53
prevention measures against XDR strain, MAY:54
risk of to health care workers, SEP:101
XDR strain an expensive infection to treat, MAY:52
XDR strain revives controversy over respirator fit-testing, MAY:55

Vancomycin
better first-line choice for *C. diff* infections, FEB:15
intermediate resistance found in CA-MRSA, APR:44

Zero tolerance for infections
'zero' heroes speak up for safety, JAN:7
four 'e' principles to reduce infections to, JAN:8
